

Jarod Aerts

CSCE 251 Assignment 1

06-09-2018

Problem 1:

- a) "man man"
- b) John H. Eaton
- c) --help or --?
- d) -f

Problem 2:

- a) A filename that is the path from the current folder in the directory hierarchy to the file.
- b) An absolute filename always has a path that can be traced all the way back to the root of the filesystem.
- c) Relative
- d) Absolute
- e) Relative
- f) Relative, that way no matter where you move that directory of files the program can always access them, since their relative file paths in relation to the program stay the same, even if their absolute one's change.

Problem 3:

- a) /usr/local/bin
- b) /usr/local
- c) /usr/lib
- d) /usr/local/bin/system
- e) Visible
